

Patent No.: 200820030798.4

National Patent for Invention Instruction

Application No.:	200820030798.4	Application date:	2008.01.11
Name:	EMC Anti-Radiation Card		
Publication No.:	CN201359857	Publication Date:	2009.12.09
Main Classification No.:	G12B17/02 (2006.01)I	Original Application No.:	
Classification No.:	G12B17/02 (2006.01)I

Summary

A kind of electromagnetic anti-radiation card, with absorbing material between the PVC layer. The absorbing material is according to the theory of energy conversion, absorbing and weaken eletromagnetic wave, transfer electromagnetic wave to heat energy. The thickness of absorbing material between PVC layer is 0.6 - 1.5mm. Absorbing material size is smaller than card size. Printing viroous pictures and letters on both sides of PVC material.
